

# EARLY MATH DEVELOPMENT

say or sing number words

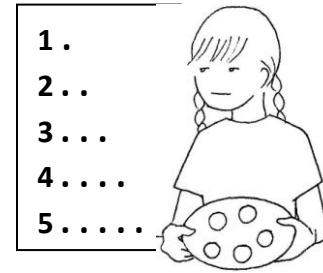

count from memory

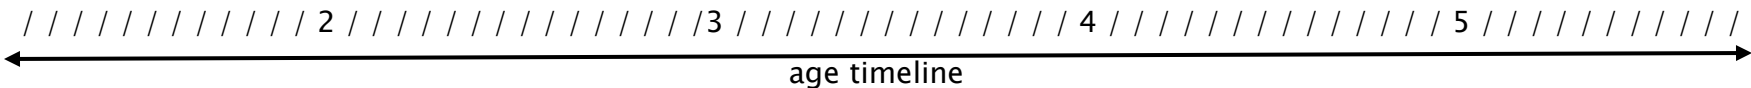

count objects

understand that numbers show how many

A young child learns from play and everyday activities

<b>Cognitive Skills</b> develop with age and practice.	<b>Concepts</b> Counting experiences become concepts when the child thinks and talks about them with an adult.			
<b>Develop the ability to count.</b>	<b>When you have finished something, you want <i>more</i>. When you get additional objects, you have <i>more</i>.</b> 	<b>People use numbers to count things.</b> 	<b>A number tells how many objects there are (quantity).</b> <p style="text-align: center;">3</p>	<b>A numeral (5) is a written symbol for a number (five).</b> <p style="text-align: center;">5 * * * * *</p>
<b>BASIS FOR SCHOOL Mathematics</b> 				

**Parents  
Caregivers**

**Use everyday activities at home and in the community as opportunities for learning. Use your home language. Talk and sing. Praise your child for learning. You are the teacher, while children's TV programs are only helpers.**
