

THE DEVELOPMENT OF NATURE CONCEPTS

A young child explores using all his or her senses

Concepts
Nature experiences become concepts when the child thinks and talks about them with an adult.

<p>Plants and animals are alive. Living things grow and change.</p> 	<p>Living things have basic needs and are interdependent.</p> 	<p>Living things have different parts.</p> 	<p>Fruit and vegetables grow on plants.</p> 	<p>Birds lay eggs in a nest.</p>

BASIS FOR SCHOOL Science

Explore the outdoors together. Use your home language. Talk about the experience. Praise your child for using his senses.
